

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	SWTID-2026-9879
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	2 Marks

Problem Statement:

Today, employees who need a standard laptop submit a request that is approved and processed manually by the IT team. Approvers are interrupted even for routine, within-budget orders, IT staff spend time creating tasks and checking stock, and requesters receive no clear updates on their order. This leads to slow delivery, inconsistent handling and frequent follow-up queries. We need a Standard Laptop catalog item in ServiceNow, powered by Flow Designer, that auto-approves orders within the budget limit, sends the rest to the Department Head, automatically creates the fulfillment task for the IT Support team, and keeps the requester informed with a request number and stage-wise notifications.

Customer Problem Statements:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A new joiner or employee who needs a standard laptop to start work.	Place a laptop request in the Service Catalog and receive the device without delay.	The request sits in a queue until someone approves it, and I have no idea where it is stuck.	Approvals and updates are handled manually, and no status notifications are sent to me.	Anxious and unable to plan my work because the delivery date is unknown.
PS-2	An IT support / fulfillment team member	Fulfill approved laptop orders correctly and within the target time.	I have to read each request, create the task, check stock and update the asset record by hand.	Every routine order needs the same repetitive steps, so mistakes and missed requests creep in.	Stressed and stretched thin, with little time left for critical issues.
PS-3	A Department Head who approves equipment purchases.	Review only the requests that exceed the budget or need a special decision.	My inbox fills with approval requests for standard laptops that are within the limit.	No rule exists to auto-approve standard, within-budget orders.	Distracted and annoyed that my time is spent on routine approvals.
