

Empathy Map

Date	29 September 2026
Team ID	SWTID-2026-9879
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	4 Marks

Empathy Map

This empathy map captures what Meera, a new joiner who needs a standard laptop, says, thinks, does and feels while waiting for her order under the current manual process. It guides the team in building a Flow Designer-based ordering flow with instant approval for in-budget requests, automatic task creation for the IT Support team and stage-wise status updates to the requester.

SAYS • “My joining date was Monday. Has my laptop request been approved yet?” • “Why is there no way to track my order?” • “I can’t start my training modules without a laptop.”	THINKS • “Is my request stuck with a manager who is on leave?” • “A standard laptop shouldn’t need this much waiting.” • “I wish I got a message at every step.”
MEERA <i>(New joiner requesting a standard laptop)</i>	
DOES • Submits the laptop request in the Service Catalog on day one • Messages the IT help desk and her team lead to ask for updates • Borrows a colleague’s system or works from a personal device meanwhile	FEELS • Impatient and left out while others are already working • Worried about falling behind in her first weeks • Reassured when she gets a clear confirmation and status update
