

Functional & Performance Testing

Model Performance Test

Date	29 September 2026
Team ID	SWTID-2026-9879
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass / Fail
FT-01	Open the Standard Laptop item from the Service Catalog	Open Service Catalog > Hardware > Standard Laptop	Item page shows description, specs, optional software check boxes, additional requirements box and the Order this Item panel with price	Page opened for Lenovo - Carbon x1 (Intel Core i5, 512GB SSD, backlit keyboard) with Adobe Acrobat and Adobe Photoshop check boxes, additional software requirements box and price \$1,100.00 (Fig. 19)	Pass
FT-02	Locate the catalog item in Maintain Items	All > Maintain Items; search Name = Standard Laptop	Standard Laptop item is listed under the Hardware category	Standard Laptop (Lenovo - Carbon x1, Hardware, \$1,100.00, Active) appeared at the top of the filtered list (Fig. 6, 7)	Pass
FT-03	Create the flow with the Service Catalog trigger	Workflow Studio > New > Flow named Standard laptop tasks; select Application > Service Catalog trigger	Flow is created with the Service Catalog trigger	Flow created in the Global application with the Service Catalog trigger selected (Fig. 11, 12)	Pass
FT-04	Add the Create Catalog Task action and activate the flow	Add Create Catalog Task action; set short description, description, assignment group and approval; click Activate	Action is configured and flow status changes to Active	Action configured with Short Description / Description 'Laptop need to Configured', Assignment group Hardware, Approval Approved; flow status became Active (Fig. 13, 14, 15)	Pass
FT-05	Link the flow to the catalog item	Open Standard Laptop > Process Engine tab; set Flow = Standard laptop tasks; click Update	Flow is saved on the catalog item	Flow field shows Standard laptop tasks (Workflow and Execution Plan empty); change saved (Fig. 16, 17, 18)	Pass

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass / Fail
FT-06	Optional software variables on the item	Open the Standard Laptop item and check the Variables tab	Optional software check boxes are available	Variables (4) list shows the Optional Software label and Adobe Acrobat / Adobe Photoshop check boxes (Fig. 8, 19)	Pass
FT-07	Order submission	Click Order Now on the Standard Laptop item	Order is submitted and the request number is displayed	Message 'Thank you, your request has been submitted' with request number REQ0010001 (Fig. 20)	Pass
FT-08	Request record is created	Open REQ0010001	Request record shows requester, opened time, price and state	Requested for System Administrator, price \$1,100.00, Approval Requested, Request state Pending Approval (Fig. 21)	Pass
FT-09	Catalog task is created by the flow	Open the catalog task for the order	SCTASK is created for the requested item with the configured values	SCTASK0010001 created for RITM0010001; short description and description 'Laptop need to Configured'; Approval Approved; State Open (Fig. 22)	Pass
FT-10	Task is routed to the Hardware group	Check the Create Catalog Task action inputs	Assignment group is set to Hardware	Action input Assignment group = Hardware, and the task was created through this action (Fig. 13, 22)	Pass
PT-01	Task creation time	Note the order time and the task creation time	Task appears within 2 minutes of the order	Task SCTASK0010001 was created about 82 seconds after the order (Fig. 22)	Pass
PT-02	Flow reliability	Order the laptop and check the records created	REQ, RITM and SCTASK are created without error	REQ0010001, RITM0010001 and SCTASK0010001 were created and the flow ran without errors (Fig. 21, 22)	Pass
PT-03	Order form usability	Select the item and place the order	Order is placed in a few clicks and confirmation is shown	Order placed by selecting the item and clicking Order Now; confirmation page with request number shown (Fig. 19, 20)	Pass
