

Project Development Phase Model Performance Test

Date	29 September 2026
Team ID	SWTID-2026-9879
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	

Model Performance Testing:

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Data comes from ServiceNow tables: Request (sc_request), Requested Item (sc_req_item), Catalog Task (sc_task) and the Inventory table.  <i>Figure 1: Request submitted: REQ0010001 created (Order Status page)</i>  <i>Figure 2: Request record REQ0010001 with approver and request state</i>  <i>Figure 3: Catalog Task SCTASK0010001 created for RITM0010001</i>

2.	Data Preprocessing	No separate preprocessing is needed because reports read live platform tables. Sample laptop models with stock counts were entered manually in the Inventory table.
3.	Utilization of Data Filters	Filters used: state (pending / approved / rejected / closed), laptop type, and opened date range.  The screenshot shows the ServiceNow Request Management interface. At the top, there are tabs for 'Request', 'Queue', 'History', 'Workspaces', and 'Actions'. Below these, there are search and filter options. The 'Request' tab is active, showing a list of requests. The 'Filter' button is highlighted, and a filter panel is open on the right. The filter panel includes sections for 'Requester', 'Requested Date Range', and 'Request State'. The 'Request State' filter is set to 'All', and the 'Requested Date Range' is set to 'All'. The 'Requester' filter is set to 'All'. Below the filter panel, there is a table of requests with columns for 'State', 'Requester', 'Requested Date', and 'Requested Date Range'. The table shows a list of requests with their respective states and dates.
4.	Aggregations / Calculations Used	Count of pending orders, approval rate (approved / total), and average delivery time (closed date - opened date).
5.	Dashboard design	No of Visualizations / Graphs - 3 (Pending orders, Approval rate, Average delivery time)
6.	Report design	No of Visualizations / Graphs - 1 (Average delivery time report)
