Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	

Project Overview:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer

Project Description: Employees order a Standard Laptop (Lenovo Carbon x1) from the ServiceNow Service Catalog. A Flow Designer flow named Standard laptop tasks runs automatically when the order is placed and creates a catalog task for the Hardware group, so the IT team receives the work without anyone raising it by hand.

Project Version: 1.0

Testing Period: 29 September 2026

Testing Scope:

Standard Laptop catalog item (Hardware category, optional software variables); flow Standard laptop tasks with Service Catalog trigger and Create Catalog Task action; flow linked on the Process Engine tab; order placement; creation of the Request (REQ), Requested Item (RITM) and Catalog Task (SCTASK) records.

As an employee, I can order a Standard Laptop from the Service Catalog and receive a request number. As a Hardware team member, I receive a catalog task automatically for every order. As an administrator, I can change the flow without writing code.

Testing Environment:
